

Product: 3/8" Oil Filter
Codes: OFM38

Product Overview:

The Tesla 3/8" oil filter is the perfect component in your oil fired system.

Installing this filter ensures the oil or kerosene passing through has been filtered to OFTEC Standard OFS E104, enabling your appliance to function better and help to extend its life.

Our filter bowl has a replaceable paper filter, ensuring great filtration of sludge and dirt associated with oil and kerosene, including metallic debris and organic matter. These paper filters should be replaced annually at service, not cleaned and reused according to the OFTEC standard.

Features & Benefits:

Suitable for oil and kerosene

Replaceable filter (code: OFMFILTER)

F x F 3/8" female BSP

Max working temp 90°C

OFTEC compliant

Biofuel compatible
