

BATTERY-POWERED

# Water Flood Detector

- Can be placed under any appliance or pipe
- Long battery life (3 years)
- Bluetooth technology

### Features and benefits

The water flood sensor from can be placed under any appliance or pipe to indicate early leaks.

If a water puddle is detected then an alert is sent instantly (via the Wireless Navitas WiFi receiver) to an App on your phone for the user to take instant action.

The battery is long life, 3 years. Water sensor can be left for that time in place or can be easily moved to any area which maybe under the threat of flooding.

Must be used in conjunction with a comparable receiver.

### Specifications

<b>Frequency</b>	2.4G, support BLE 4.1 version, backward compatible
<b>Working Voltage</b>	3 VDC (1PCS CR2450 button battery)
<b>Communication Distance</b>	100 m (open area)
<b>Static Current</b>	$t \leq 15 \mu\text{A}$
<b>Transmit Current</b>	$\leq 20 \text{ mA}$ (433/315M) $\leq 35 \text{ mA}$ (868M)
<b>Status Report</b>	Trigger report , Tamper report, Battery level status report, Heartbeat report
<b>Dimensions</b>	60 mm (Dia) x 15 mm (H)
