

**Product:** Black Lever Ball Valves  
**Codes:** BVL15B, BVL22B, BVL28B

## Product Overview:

Lever handle ball valves have a quarter-turn function which moves a ball within the valve to control the flow of a substance through pipes.

The main benefit of our black handle lever ball valves is that they come with red and blue bands, already on the handle, so you only need to take off the one you do not need, cutting down on the amount of stock you need to hold in your warehouse, shop or van.

## Features & Benefits:

- Red and blue indication bands
- Quick quarter-turn operation
- WRAS approved
- Minimal stock holding
- Working temperature from -10°C to 80°C
- Max working pressure 25bar (dependant on temperatures)
- Full bore

## Suitable for:

- Hot and cold Water
- Glycol
- Oil
- Cerosine
- HVO

## Specification:
